Contents

ix **Course Overview**

1 Unit 1: Explaining the Basics of Overhead Cost Controlling

- 1 Lesson: Describing the Architecture of Management Accounting
- 1 Lesson: Explaining the Purpose of Cost Center Accounting
- 1 Lesson: Differentiating Between Cost Centers and Overhead Projects

3 Unit 2: Explaining Cost Center Accounting

- 3 Lesson: Outlining Cost Center Accounting Processes
- 3 Lesson: Outlining Core Cost Center Accounting Processes
- 3 Lesson: Creating and Managing Cost Centers
- 3 Lesson: Checking Controlling Specific Settings of G/L Accounts
- 3 Lesson: Setting up Activity Types for Direct Activity Allocation
- 3 Lesson: Creating Statistical Key Figures for Cost Allocations
- 4 Lesson: Managing Hierarchies in Cost Center Accounting
- 4 Lesson: Evaluating the Scope of Planning in Cost Center Accounting
- 4 Lesson: Planning Expenses, Activity Quantities, Cost Rates and Statistical Key Figure Values
- 4 Lesson: Navigating in Cost Center Accounting Reports
- 4 Lesson: Using Advanced Reporting Functionality in Cost Center Reporting
- 4 Lesson: Evaluating the value flow from financial accounting
- 5 Lesson: Describing Postings Within Management Accounting
- 5 Lesson: Entering Actual Statistical Key Figure Values
- 5 Lesson: Analyzing Overhead Allocation Cycles
- 5 Lesson: Adapting and Running Allocation Cycles

7 Unit 3: Explaining Project Controlling

7	Lesson: Outlining the Course Scenario
7	Lesson: Distinguishing Between Cost Centers and Projects
7	Lesson: Distinguishing Between Project and WBS Element
7	Lesson: Creating Overhead Projects
7	Lesson: Checking and Adapting Hierarchies
7	Lesson: Displaying and Explaining the Status of a Project
8	Lesson: Explaining Key Project Attributes
8	Lesson: Uploading Project Plan Data
8	Lesson: Uploading Project Budget Data
8	Lesson: Using Project Controlling Reports
8	Lesson: Distinguishing Between Real and Statistical Projects
8	Lesson: Posting Journal Entries to Projects
8	Lesson: Posting Direct Activity Allocations
9	Lesson: Tracking Commitments on Projects
9	Lesson: Reassigning Costs Between Projects
9	Lesson: Allocating Costs to Projects
9	Lesson: Settling a Project

11 Unit 4: Outlining Cost Estimate Options in Product Cost Planning

11	Lesson: Explaining Cost Estimates and Their Purpose
11	Lesson: Identifying and Integrating Material Master Data in Product Cost Planning
11	Lesson: Introducing Quantity Structure and Value Structure
11	Lesson: Identifying Costing Items in Cost Estimates
11	Lesson: Defining the structure of a Cost Estimate in the Display Material Cost Estimates Fiori App
12	Lesson: Comprehending Cost Estimate Quantities and Value Structures in Material Master Data
12	Lesson: Analyzing Material Master Data from a Controlling Perspective
12	Lesson: Identifying Labor and Cost Structures for Production
12	Lesson: Comprehending Work Centers and Cost Structures
12	Lesson: Explaining the Valuation of Quantity Structure
12	Lesson: Applying Overhead Costs
12	Lesson: Summarizing COGS Detail, Line Items, Cost Elements, and Cost Components
13	Lesson: Analyzing and Comparing the Cost Estimates
13	Lesson: Updating the Standard Price in the Material Master Record

15 Unit 5: Explaining Scenarios in Production Accounting

15	Lesson: Identifying the different business needs of analysis in Production Accounting
15	Lesson: Considering the Lot-Based Production (Make-To-Stock Scenario)
15	Lesson: Considering the Repetitive Production (Make-To-Stock Scenario)
15	Lesson: Considering the Sales-Order-Related Production (Make-To-Order Scenario)
15	Lesson: Considering the Project-Related Production (Engineer-To-Order Scenario)
16	Lesson: Discovering Product Cost Analysis by Order in Lot-Based Production (Make-To-Stock Scenario)
16	Lesson: Discovering Product Cost Analysis by Period in Repetitive Manufacturing (Make-To-Stock Scenario)
16	Lesson: Discovering Sales-Order-Related Production (Make-To-Order Scenario)
16	Lesson: Discovering Project-Related Production (Engineer-To-Order Scenario)
16	Lesson: Highlighting the Different Principles of Production Costs (Period-End closing or Event-Based production costs)
16	Lesson: Highlighting the Impact of Universal Parallel Accounting (UPA) on Production Scenarios
17	Lesson: Outlining the MTS Production Process Steps
17	Lesson: Detailing a Production Order
17	Lesson: Valuating Resource Consumption (goods, labor)
17	Lesson: Detailing Error Handling for Calculations of Overhead, Work in Process, or Variance

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Application Consultant
- Business User

Lesson 1: Describing the Architecture of Management Accounting

Lesson Objectives

After completing this lesson, you will be able to:

- List the components of management accounting

Lesson 2: Explaining the Purpose of Cost Center Accounting

Lesson Objectives

After completing this lesson, you will be able to:

- Define the purpose of cost center accounting

Lesson 3: Differentiating Between Cost Centers and Overhead Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Contrast the usage of cost centers and overhead projects

Lesson 1: Outlining Cost Center Accounting Processes

Lesson Objectives

After completing this lesson, you will be able to:

- List key overhead cost controlling terms

Lesson 2: Outlining Core Cost Center Accounting Processes

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the core cost center accounting processes

Lesson 3: Creating and Managing Cost Centers

Lesson Objectives

After completing this lesson, you will be able to:

- Manage cost center master data

Lesson 4: Checking Controlling Specific Settings of G/L Accounts

Lesson Objectives

After completing this lesson, you will be able to:

- Analyze cost accounts

Lesson 5: Setting up Activity Types for Direct Activity Allocation

Lesson Objectives

After completing this lesson, you will be able to:

- Manage activity type master data

Lesson 6: Creating Statistical Key Figures for Cost Allocations

Lesson Objectives

After completing this lesson, you will be able to:

- Manage statistical key figure master data

Lesson 7: Managing Hierarchies in Cost Center Accounting

Lesson Objectives

After completing this lesson, you will be able to:

- Manage the cost center hierarchy

Lesson 8: Evaluating the Scope of Planning in Cost Center Accounting

Lesson Objectives

After completing this lesson, you will be able to:

- Outline cost center planning

Lesson 9: Planning Expenses, Activity Quantities, Cost Rates and Statistical Key Figure Values

Lesson Objectives

After completing this lesson, you will be able to:

- Upload plan data relevant to cost center accounting

Lesson 10: Navigating in Cost Center Accounting Reports

Lesson Objectives

After completing this lesson, you will be able to:

- Recall the core reports for cost center accounting

Lesson 11: Using Advanced Reporting Functionality in Cost Center Reporting

Lesson Objectives

After completing this lesson, you will be able to:

- Use advanced reporting functions

Lesson 12: Evaluating the value flow from financial accounting

Lesson Objectives

After completing this lesson, you will be able to:

- Post costs to cost centers

Lesson 13: Describing Postings Within Management Accounting

Lesson Objectives

After completing this lesson, you will be able to:

- Identify postings to cost centers within controlling

Lesson 14: Entering Actual Statistical Key Figure Values

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the use of actual statistical key figure postings in period-end postings

Lesson 15: Analyzing Overhead Allocation Cycles

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the allocation cycle logic in SAP S/4HANA

Lesson 16: Adapting and Running Allocation Cycles

Lesson Objectives

After completing this lesson, you will be able to:

- Set up allocation cycles

Lesson 1: Outlining the Course Scenario

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the purpose of overhead projects

Lesson 2: Distinguishing Between Cost Centers and Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Discuss when to use overhead projects versus cost centers

Lesson 3: Distinguishing Between Project and WBS Element

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the relation between a project and a WBS element

Lesson 4: Creating Overhead Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Create overhead projects

Lesson 5: Checking and Adapting Hierarchies

Lesson Objectives

After completing this lesson, you will be able to:

- Manage project hierarchies

Lesson 6: Displaying and Explaining the Status of a Project

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the impact of a status on daily operations linked to the WBS element

Lesson 7: Explaining Key Project Attributes

Lesson Objectives

After completing this lesson, you will be able to:

- Identify the most important attributes of a project

Lesson 8: Uploading Project Plan Data

Lesson Objectives

After completing this lesson, you will be able to:

- Upload planning data

Lesson 9: Uploading Project Budget Data

Lesson Objectives

After completing this lesson, you will be able to:

- Upload budget data

Lesson 10: Using Project Controlling Reports

Lesson Objectives

After completing this lesson, you will be able to:

- Use SAP S/4HANA embedded analytics

Lesson 11: Distinguishing Between Real and Statistical Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Differentiate between the usage of real and statistical projects

Lesson 12: Posting Journal Entries to Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Post G/L journal entries

Lesson 13: Posting Direct Activity Allocations

Lesson Objectives

After completing this lesson, you will be able to:

- Perform direct activity allocation

Lesson 14: Tracking Commitments on Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Outline the process of commitment follow-up

Lesson 15: Reassigning Costs Between Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Reassign costs between projects

Lesson 16: Allocating Costs to Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Allocate costs to projects

Lesson 17: Settling a Project

Lesson Objectives

After completing this lesson, you will be able to:

- Settle projects

Lesson 1: Explaining Cost Estimates and Their Purpose

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the purpose of cost estimates in controlling

Lesson 2: Identifying and Integrating Material Master Data in Product Cost Planning

Lesson Objectives

After completing this lesson, you will be able to:

- Explain the role of material master data in Product Cost Planning

Lesson 3: Introducing Quantity Structure and Value Structure

Lesson Objectives

After completing this lesson, you will be able to:

- Explain how to define a cost estimate through quantity structure and value structure

Lesson 4: Identifying Costing Items in Cost Estimates

Lesson Objectives

After completing this lesson, you will be able to:

- Identify costing items and explain how they define cost estimates

Lesson 5: Defining the structure of a Cost Estimate in the Display Material Cost Estimates Fiori App

Lesson Objectives

After completing this lesson, you will be able to:

- Use the Display Material Cost Estimates app

Lesson 6: Comprehending Cost Estimate Quantities and Value Structures in Material Master Data

Lesson Objectives

After completing this lesson, you will be able to:

- Define the connection between cost estimates with quantities and value structures

Lesson 7: Analyzing Material Master Data from a Controlling Perspective

Lesson Objectives

After completing this lesson, you will be able to:

- Explain materials from a controlling point of view

Lesson 8: Identifying Labor and Cost Structures for Production

Lesson Objectives

After completing this lesson, you will be able to:

- Identify the labor costs to manufacture a product

Lesson 9: Comprehending Work Centers and Cost Structures

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the role of work centers in production

Lesson 10: Explaining the Valuation of Quantity Structure

Lesson Objectives

After completing this lesson, you will be able to:

- Explain how valuation uses material and activity price data

Lesson 11: Applying Overhead Costs

Lesson Objectives

After completing this lesson, you will be able to:

- Apply overhead percentages

Lesson 12: Summarizing COGS Detail, Line Items, Cost Elements, and Cost Components

Lesson Objectives

After completing this lesson, you will be able to:

- Calculate the cost of goods manufactured (COGM) and cost of goods sold (COGS)

Lesson 13: Analyzing and Comparing the Cost Estimates

Lesson Objectives

After completing this lesson, you will be able to:

- Identify which application to use to display and compare cost estimate results

Lesson 14: Updating the Standard Price in the Material Master Record

Lesson Objectives

After completing this lesson, you will be able to:

- Define the various price fields in the material master

Lesson 1: Identifying the different business needs of analysis in Production Accounting

Lesson Objectives

After completing this lesson, you will be able to:

- Outline the business needs of analysis for a production controller

Lesson 2: Considering the Lot-Based Production (Make-To-Stock Scenario)

Lesson Objectives

After completing this lesson, you will be able to:

- Describe lot-based production (make-to-stock scenario) and its main characteristics.

Lesson 3: Considering the Repetitive Production (Make-To-Stock Scenario)

Lesson Objectives

After completing this lesson, you will be able to:

- Outline repetitive production (make-to-stock scenario) and its main characteristics

Lesson 4: Considering the Sales-Order-Related Production (Make-To-Order Scenario)

Lesson Objectives

After completing this lesson, you will be able to:

- Outline sales-order-related production (make-to-order scenario) and its main characteristics

Lesson 5: Considering the Project-Related Production (Engineer-To-Order Scenario)

Lesson Objectives

After completing this lesson, you will be able to:

- Outline project-related production (engineer-to-order scenario) and its main characteristics

Lesson 6: Discovering Product Cost Analysis by Order in Lot-Based Production (Make-To-Stock Scenario)

Lesson Objectives

After completing this lesson, you will be able to:

- Describe which cost object is used in lot-based production (make-to-stock scenario)

Lesson 7: Discovering Product Cost Analysis by Period in Repetitive Manufacturing (Make-To-Stock Scenario)

Lesson Objectives

After completing this lesson, you will be able to:

- Define the cost object used in repetitive manufacturing (make-to-stock scenario)

Lesson 8: Discovering Sales-Order-Related Production (Make-To-Order Scenario)

Lesson Objectives

After completing this lesson, you will be able to:

- Define the cost object used in sales-order-related production (make-to-order scenario)

Lesson 9: Discovering Project-Related Production (Engineer-To-Order Scenario)

Lesson Objectives

After completing this lesson, you will be able to:

- Define the cost object used in project-related production (engineer-to-order scenario)

Lesson 10: Highlighting the Different Principles of Production Costs (Period-End closing or Event-Based production costs)

Lesson Objectives

After completing this lesson, you will be able to:

- Contrast the principles of production costs (period-end closing or event-based production costs)

Lesson 11: Highlighting the Impact of Universal Parallel Accounting (UPA) on Production Scenarios

Lesson Objectives

After completing this lesson, you will be able to:

-
- Contrast product and operations scenarios in regards to universal parallel accounting

Lesson 12: Outlining the MTS Production Process Steps

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the steps of the make to stock (MTS) production process

Lesson 13: Detailing a Production Order

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the main elements of a production order

Lesson 14: Valuating Resource Consumption (goods, labor)

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the goods issue step, the confirmation of work for routing operations' level, and their subsequent posting mechanisms

Lesson 15: Detailing Error Handling for Calculations of Overhead, Work in Process, or Variance

Lesson Objectives

After completing this lesson, you will be able to:

- learn the different steps of the error-handling process for calculations of overhead, work-in-process, or variance.
